

# RENTAL RETURN

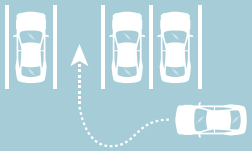

# KINTO

Make sure you have enough time to clean the exterior and interior of the vehicle as you must return in the same condition as it was at pick-up time.

Your rental must be returned with a full tank of fuel or 150 miles of range if it is an EV.

Return your KINTO rental on time to same location as you picked it up from.

Begin the return process in the KINTO app. Including taking clear exterior photos of all vehicle angles as requested.

When prompted take and upload a photo of the fuel gauge and odometer.

Double check you have removed all personal belongings.

Lock the vehicle and make sure you have completed all the steps to END YOUR RESERVATION in the KINTO app.

If you are running late to return your vehicle please remain in constant contact with our customer support team via text.
